

Keep Talking and LAMPI ♀ Doesn't Explode

BOMB DEFUSAL
MANUAL
Version 1

Welcome to the dangerous and challenging
world of bomb defusing.

Study this manual carefully; you are the
expert. In these pages you will find
everything you need to know to defuse even
the most insidious of bombs. And remember
– One small oversight and it could all be
over!

On the Subject of Wires

*Wires are the lifeblood of electronics! Wait, no, electricity is the lifeblood.
Wires are more like the arteries. The veins? No matter...*

Wires can be:

- Red, Blue, Green, Orange
- Squiggly, Zigzag, or straight

Wire ordering begins with the first on the left.

# of Squiggly wires/ # of Zigzag wires	0	1	2	3	4
0	Red wire? Cut 1st wire Otherwise Cut last wire	Green wire? Cut squiggly wire Otherwise Cut 2nd wire	Orange wire? Cut 1st wire Otherwise Cut last wire	Green wire? Cut a green wire Otherwise Cut 3rd wire	Cut any wire
1	Green wire? Cut the zigzag wire Otherwise Cut 2nd wire	Blue wire? Cut any wire Otherwise Cut 2nd wire	Green wire? Cut a green wire Otherwise Cut 1st wire	Red wire? Cut 1st Otherwise Cut last wire	
2	Orange wire? Cut 1st wire Otherwise Cut last wire	Green wire? Cut a green wire Otherwise Cut 1st wire	Blue wire? Cut any wire Otherwise Cut 2nd wire		
3	Green wire? Cut a green wire Otherwise Cut 3rd wire	Red wire? Cut 1st Otherwise Cut last wire			
4	Cut any wire				

On the Subject of Wires: Partners

Y'know every wire's favorite saying: Teamwork makes the dreamwork!
Or maybe they like to say Bzzzz Bzzzz (because of the flow of electricity).
 Wires can be:

- Red, Blue, Green, Orange
- Squiggly, Zigzag, or straight

You each have two wires, both LEDs are the same color, there are two wires to cut

Total # of Squiggly wires/ Total # of Zigzag wires	0	1	2	3	4
0	Orange LED? Partner 1: Cut 1st wire Partner 2: Cut last wire	Green LED? Partner 1: Cut squiggly wire Partner 2: Cut 2nd wire	Blue LED? Partner 1: Cut 1st wire Partner 2: Cut last wire	Red LED? Partner 1: Cut a green wire Partner 2: Cut 3rd wire	White LED? Cut any wire
1	Green LED? Partner 1: Cut zigzag wire Partner 2: Cut 2nd wire	Yellow LED? Partner 1: Cut any wire Partner 2: Cut 2nd wire	Purple LED? Partner 1: Cut a green wire Partner 2: Cut 1st wire	Orange LED? Partner 1: Cut 1st wire Partner 2: Cut last wire	
2	Red LED? Partner 1: Cut 1st wire Partner 2: Cut last wire	Pink LED? Partner 1: Cut a green wire Partner 2: Cut 1st wire	Blue LED? Partner 1: Cut any wire Partner 2: Cut 2nd wire		
3	Green LED? Partner 1: Cut a green wire Partner 2: Cut 3rd wire	Blue LED? Partner 1: Cut 1st wire Partner 2: Cut last wire			

4	White LED? Cut any wire	
---	----------------------------	--

On the Subject of Sliders:

*Why have to enter a specific value when you can sliiiiiide to it?
Hopefully your accuracy is good..*

- There will always be 3 sliders.
- Each slider controls a different property of the LED. From top to bottom, these properties (with modes) are:

Slider Type	Ranges
Hue (H)	Red (0.0 - 0.1) Yellow (0.2 - 0.3) Blue (0.5 - 0.6) Purple (0.7-0.8)
Saturation (S)	Light (0.0 - 0.3) Muted (0.4 - 0.6) Saturated (0.7 - 1.0)
Brightness (B)	Dim (0.0 - 0.3) Moderate (0.4 - 0.6) Bright (0.7 - 1.0)

Based on the current color of the LED, you must change the sliders as described below. The color will not change while this puzzle is in the process of being solved. You must press the RED button whenever you want to solve and complete this puzzle.

LED's Color	Instruction
Red	H - Blue S - Muted B - Bright
Yellow	H - Purple S - Saturated B - Moderate
Blue	H - Red S - Light B - Dim
Purple	H - Yellow

	S - Saturated B - Bright
--	-----------------------------

On the Subject of Sliders: Partners

Sliding is more fun together!

- There will always be 3 sliders.
- Each slider controls a different property of the LED. From top to bottom, these properties (with modes) are:

Slider Type	Ranges
Hue (H)	Red (0.0 - 0.1) Yellow (0.2 - 0.3) Blue (0.5 - 0.6) Purple (0.7-0.8)
Saturation (S)	Light (0.0 - 0.3) Muted (0.4 - 0.6) Saturated (0.7 - 1.0)
Brightness (B)	Dim (0.0 - 0.3) Moderate (0.4 - 0.6) Bright (0.7 - 1.0)

Based on the color of your partner's original LED color, you must change your slider value to another color.

LED's Color	Instruction
Red	H - Purple S - Saturated B - Moderate
Yellow	H - Blue S - Muted B - Bright
Blue	H - Yellow S - Saturated B - Bright
Purple	H - Red S - Light B - Dim
